

# PetWatch Brochure

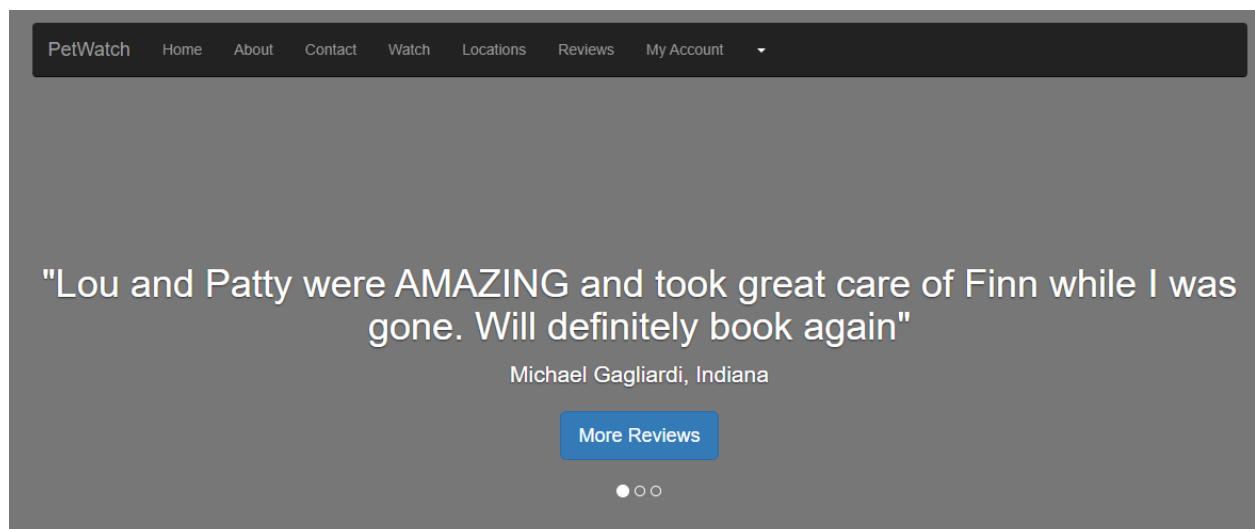

INFO C451

GAGLIARDI, MICHAEL L

**Project URL:** <https://github.com/mlgagliardi1/mlgagliardi1.github.io>

## Features:

- Homepage
  - A thematic homepage that is viewed as the main page user's see when visiting the site, as well as the main hub from which users can login to the site.

### Reviews

PetWatch relies on reviews to ensure that pets are adequately cared for. Plus, it gives you assurance that your pet is in a home you can trust.

Send

- Watch
  - A “user dashboard” from which users can view homeowners who are willing to watch their pet for requested days.
- Locations
  - A locations page from which users can add their home, farm, kennel, etc. This input is then translated to the Watch tab.
- Reviews
  - A reviews page from which users can submit a new review or view existing reviews based on the selected vendor.
- My Account
  - An account dashboard from which users can view account details, view their reservations, add or remove pets, and login/logout.

- Blog
  - A PetWatch managed blog that is used to display updates about PetWatch.
- Login
  - A login button that brings users to the generic login page, as well as the signup page.
- Admin
  - An admin site from which PetWatch staff can view the database, users, and all other user manipulated data. Additionally, staff can edit or remove data as necessary.
